-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Egashira et al (5,252,652) in view of Tamura et al (5,585,152). Regarding claim 1, Egashira discloses a solid golf ball comprising a core and a cover (abstract; fig 2). Egashira discloses the cover may be made from commonly used cover materials but does not disclose the polyurethane composition claimed by applicant. Applicant claims a polyurethane cover containing components A, B, and C. Component A is a thermoplastic polyurethane, component B is a thermoplastic polyamide, and component C is an isocyanate mixture. Applicant discloses component C, the isocyanate mixture, is preferably commercially available Crossnate EM30 (spec 9). Tamura teaches a composition comprising a thermoplastic polyurethane (applicant's A), a polymer

Art Unit: 3711

(applicant's B), and Crossnate EM 30 (applicant's C). The polyurethane mixture is shown in examples 13-16 (table 5). E580F(1), E580F(2), E1080A(1), and E1080A(2) are mixtures of polyurethane and Crossnate EM30 (col. 15, lines 1-15). The hardness of the cover layer from 40 to 80 is an obvious feature of the composition taught by Tamura since applicant's composition is identical. Regarding claim 2, the isocyanate mixture features are obvious over Tamura since both disclose Crossnate EM30 as an option. Regarding claims 3 and 4, the polyurethane resin includes 5% by weight of the isocyanate mixture (col. 14, lines 64-67). The composition is 65% polyurethane resin and the isocyanate mixture (A and C) and 35% polymer (B). Regarding claim 5, since the materials are identical the composition is obviously capable of being recycled. One skilled in the art would have modified the cover of Egashira with the composition of Tamura to increase the mold releasing properties and impact resilience (see Tamaura col. 1, lines 10-15).
